Work History

ROZUMSOFT Apr 2019 - Jun 2021 (2.2 years)

Blockchain Developer / Software developer

Moscow, Russia

- Developed the front-end code for Ascribe, the first platform for digital art rights management on the Bitcoin blockchain.
- Composed and optimized the back-end code from queries to execution time.
- Built a custom web crawler that could download 1.5 billion images from the web while optimizing resources and execution time.
- Constructed a high-performance reverse-search engine called image-match.

CORTEX TECHNOLOGY Mar 2017 - Aug 2018 (1.4 years)

Web & Mobile Developer

Krasnodar, Russia

- Worked on React Native application development for the iPhone, iPad, and Android.
- Designed and implemented application architecture.
- Coordinated agile development process and release cycles.
- Made unit tests and implemented UI test code coverage.
- Profiled and analyzed applications using various development tools.

APPOMART Sep 2014 - Sep 2016 (2 years)

Front-end JavaScript Developer

Sankt-Peterburg, Russia

Developed UIs using ReactJS with JavaScript and TypeScript.

Participated in the full lifecycle of development for company web applications using JS framework including React and Vue.

Maintained and improved the client portal React application.
